Subject: draft paper for ECAD/LCRD director briefing
Attachments: PFAS Anvil Briefing1-11-21 (003).docx

Mike – as requested, here's a draft of the revised paper for the regional briefing scheduled this Wednesday. You'll see there's also a placeholder at the very end for us to add a contact for additional information. We weren't sure who in HQ to name as a point of contact. Could you add that and put this on the Sharepoint (in place of the outdated December briefing) so others can take a quick look before this goes out to the regions?

Thanks and let us know if questions.
